Open House Slated

The Program Advisory Committee is having an "Open House" for all students to attend, on March 30, in the Hall of Governors. The event is expected to provide the students with the opportunity to meet with their PAC representatives, and suggest various programs and events, as well as gain new insights into what exactly PAC's purpose is.

The "Open House" is slated to run from noon to 7 p.m., and refreshments will be served. Various members of PAC will be on hand to answer questions.

The Program Advisory Committee is responsible for many of the events that are held on campus. PAC brought Dick Gregory, as well as the movie "Ragtime" to campus.

Student Senate Activity

Votes Increase Student Fees

by Alan Geierman

Student Activity Fees are expected to increase, according to both Dean Borelli's recommendations, and the vote by the Student Senate, at their last meeting.

In light of the \$35,000 deficit discovered earlier in the term, the increase is expected to "off set" the deficit, and contribute to balancing the budget for next year.

Dean Borelli addressed the Senate meeting, and suggested a \$20 increase, with \$10 for the students that take only Block 1 or Block 2 courses. The Senate's recommendation was for \$25 and \$12.50 respectively.

Senator Steve Bluth explained the principles of budgeting to the Senate, and then proposed a 66% increase in the fee after indicating that a deficit was apparent. "A budget is a plan of action in numbers," he began, and later referred to the process of accounting as an "educated guess," on the part of the business offices. This is due to the fact that there are anticipated resources and after the enrollment figures are reached, and shortfalls in enrollment may cause the fluctuations in the actual revenues.

This, however, only accounts for a little more than half of the deficit that the Senate faces next year. The other 43% is attributed to the

business office's error, which has not been explained to the Senate.

"I think it was unfortunate that the Dean (Borelli) was opposed to the decision that was made by the Senate," said Michael Blackburn, President. "I am adamantly opposed to carry the deficit for three or four years." Blackburn was not alone in his feelings. Senator Eddy Abakporo also expressed concern, "The problem is management, I see a lot of waste," he said addressing the Senate on the subject. He was also concerned that the senate was approving the spending of approximately \$2000 on personal items such as tee-shirts and calendars.

Abkaporo was the only Senator consistent in advocating tighter controls. He voted against every spending measure suggested by the council, and on the subject of the fee increase, he said, "The student has a budget to balance, too, \$10 is quite a big amount."

Blackburn expressed his concern about the deficit to the entire council senate in these terms, "It's a lot to ask the future Student Senates to deal with a deficit, I think it is realistic to ask Student Activities to become self sufficient."

This increase not only off sets the deficit, but, anticipates the ex-

State Legislature

DeAngelis Criticizes Tate

by Thom Gibbons

"It's absolutely outlandish," said Sen. Aldo DeAngelis in referring to the recent announcement of Rep. Michael Tate (Decatur) that he intended to introduce legislation aimed at closing GSU as well as the law schools at Northern Illinois University and Southern Illinois University.

De Angelis criticized the manner in which the Representative chose to announce his intention, and said that he feels that closing the institution would "not represent a

true savings" to the State of Illinois. He also feels that in the present job climate it is necessary to provide for public education for those who have to change careers.

Tate called a press conference to announce his "intention to introduce" this legislation. Apparently he did this before filing the bill with the State Legislature. De Angelis pointed out that legislation is normally filed before it is announced at a press conference.

De Angelis says that he will "vigorously oppose" this piece

legislation not only because he feels that the savings proposed are "distorted savings" but he is thoroughly in favor of the "unique" education provided by GSU.

The Senator says that closing GSU is "very unlikely to happen" because it doesn't represent a true savings. He pointed out that even if the University closed the State would still have to maintain the buildings as well as provide compensation for the dismissed employees.

He says that similar legislation

has been introduced before, "but it has never gone anywhere." However, he did point out that many legislators want to study the possibility of budget reform before they are willing to consider tax reforms.

Several times the Senator said that in the current job climate he thinks that public education is important to train not only persons entering the job market for the first time, but is necessary to retrain those who may have to make career changes as the result of losing their jobs.

GSU Host Community Colleges

Governors State University hosted the annual Community Colleges Articulation in Engbretson Hall.

President Leo Goodman-Malamuth II opened by assuring the participants that "closing GSU is not going to happen." Further he said, "I would put my paycheck on the line, it's not going to happen."

Dr. Curtis, the Provost, described the organizational changes that will be occurring at GSU this year. This includes the physical changes of departments from one college to another as well as the proposed competency test-

Photo by Roger Paris

Tom Deem, Director of Community College Relations welcoming guests to GSU. GSU President Leo Goodman-Malamuth II and Provost David Curtis are at the table.

ing that is planned for implementation in the fall.

He also told the community college counselors that GSU is planning to have a bachelors of science degree in social work and is working on a degree in computer science to be offered in the fall term of 1984.

Dean Borelli explained what the competency testing is all about. It will begin this fall and those who are degree seeking students will have to take the test before they have completed 20 credit hours. The testing will be done in the area of English and Mathematics.

Sarah A. Crawford, the newly appointed registrar at Governors State University.

Crawford joins GSU following two years on the administrative staff of Purdue University-Calumet, most recently as associate registrar and coordinator of institutional research. Prior to that, she served for five years as assistant registrar.

The new registrar holds both the B.A. and M.S.Ed. degrees from Purdue University and is a candidate for the Ph.D. at Loyola

YMCA Sponsors Race

The YMCA at Governors State university will sponsor a "Y Run," a 3.1 mile race and 1/3 mile "fun run" for children on April 16 at Governors State university, Route 54 and Stuenkel road, Park Forest South.

Check-in time on race day is between 7:15 and 8:45 a.m. The 1/3 mile fun run, which is open to children 12 years of age and younger, will kick off at 8:30 a.m.; the 3.1 mile run will start at 9 a.m. Refreshments, splits every mile and an aid station will be featured over the race course, which follows a flat and rolling loop over country roads and trails.

T-shirts will be given to the first 400 entrants. Awards will be presented to the top five runners in

both the male and female divisions. The first 125 pre-registered entrants in the 3.1 mile race will receive sun visors, also. All fun runners will receive an award.

Age Divisions are as follows in the 3.1 mile race (for both male and female): 10-14 years; 15-19 years; 20-24 years; 25-29 years; 30-34 years; 35-39 years; 40-44 years; 45-49 years; 50-59 years and 60 and over.

Entry fee for the 1/3 mile race prior to April 16 is \$5 per person, or \$6 on race day. The entry fee for the 3.1 mile race prior to April 16 is \$7, or \$8 on race day. Pre-registered runners may pick up their shirts and race packets after April 11 at the YMCA at Governors State university.

Students Win Championship

GSU claims what may be its first national championship in inter-collegiate competition--on the scholastic level.

Four graduate students in the School of Health Professions have won the third Annual Hospital Financial Management and Regulation Computer Simulation Game held during the national convention of the American College of Hospital Administrators in Chicago on March 1-4.

Diane Barowsky, Oak Forest; Candace St. Lawrence, of Mercy Hospital and Medical Center, Chicago; Lynda Reese, of St. Mary's Hospital, Gary; and Jack Weiss, in residency training in Buffalo, won the title in competition with teams from the University of North Carolina-Chapel Hill and the University of Arizona.

The GSU students defeated teams from the University of

Michigan, University of Chicago, Xavier (Ohio) University, Trinity University and Baylor University to reach the championship competition.

The students participated in four rounds of computer games and appeared in two public hearings. During the four-day meeting, they demonstrated proficiency in technical financial decisions, meeting community service needs, and the decision-making process and oral presentation. Their faculty advisor in the contest was Dr. Brian Malec, university professor of health services administration.

The members of the winning GSU team received first place certificates and a series of books on hospital management in addition to recognition from the 3,000 to 4,000 hospital management professionals at the convention.

Fees Increasing

Cont. From Page 1

pected increase that Senators Gala Jenkins and Dawn Jackson feel is inevitable. Jackson said, "We want them (the students) to realize the benefits of the increase, rather

than just cover the deficit." Jenkins stated, "We don't know what new clubs are being formed, and how much money that they will ask for."

Juvenile Corrections

Student Speaks in Texas

Otis Hilliard, a Criminal Justice major and member of both the Program Advisory Committee and the Criminal Justice Club, presented a paper at the San Antonio Academy of Criminal Justice Scientists' Annual convention titled "Mental Health and the Juvenile Corrections."

Hilliard selected that subject because of his working experience at the Illinois Youth Center in Joliet where as many as 170 youths may be under the care of a single psychiatrist at the same time and he may be working for more than

one institution at the same time.

He left that youth center, because he felt that "the policies and practices were adverse to positive rehabilitation of the inmates." Hilliard says that although the attitudes towards mental health have improved, the administrators do not address many of the problems.

Hilliard, who spoke at the Midwest Association on Criminal Justice Educators in Indianapolis last fall, says "I'm doing this for the experience and the exposure. There are issues that need to be brought out."

Student Loans

Assign Bad Loans to U.S.

The Board of Governors held a special meeting March 14, to determine last minute budget affairs, and to allow the BOG Universities to make one more attempt to assign defaulted student loans to the federal government.

GSU, Chicago State, and Northeastern, all submitted bad loans to the BOG, for assignment to the collections department of the federal government. When these assignments are made, they reduce the number of bad debts on the school's books. If the number of outstanding student loans is more than 25%, the school will receive no federal funding. Between 10% and 25% will be pro-rated with the number of student loans, and the amount of federal funds, less than 10% usually has no effect on the

amount of federal funding the school receives.

Salary increases were also on the agenda, and administrative positions and staff not involved with a collective bargaining unit, were granted 3% pay hikes, with a lump sum equivalent to the amount of the December 31, 1982, pay periods of the last three months. The retroactive payment will be only for the period of the last three months, and continue as the base rate of pay for the rest of the fiscal year.

A \$10,289 air charter was also approved for Eastern Illinois' Football team for their game against the school in Akron, Ohio in their division. The game is scheduled for October, but requests for amounts greater than 10,000 must be made before March 31.

Rogge Speaks

Focuses on Religion & Wellness

by Donna Landers

Professor William Rogge, from the College of Human Learning and Development at GSU, was the guest speaker at the March 23 meeting of "Theology for Lunch." The theme for discussion at this meeting was "Religion and Wellness."

Each Wednesday the Campus Ministries Council sponsors a meeting from noon until one o'clock in the Honors Dining Room, which is located next to the cafeteria. Meetings are hosted by Fr. Joseph Stalzer and Pastor Elmer Witt, GSU Campus Ministries. They extend an open invitation to anyone on the GSU Campus.

Rogge, an emotional yet soft-spoken man with an easy going manner, began by stating, "Life is not finite...at least in a corporal sense. I have to think about retiring soon, and it is important for me to sort out what is really meaningful in my life."

Rogge said that at age 40 he went through a career and an identity crisis. He was unsatisfied and restless. He chose to leave the university setting and the prestige. He felt that he, like many teachers, get stuck in a routine, losing touch with their students. He quit and became a principal for a while. He

said, "I had to go out and prove myself. I took a lot of lumps, learned many new things, and found myself happier." He said the resolution to some of his problems came when he gave up the hopeless ideal that he would be famous and "shake the world up."

He hurdled another crisis in his life when he overcame the depression and pain of divorce. He suffered severe illness and emotional stress, and said, "While recovering I realized that my well being depended upon not taking some problems so seriously, but upon doing what I wanted to do."

Rogge feels that people are so concerned about what others expect of them, they never stand still to ask themselves, "What do I want?" He urges each of us to find the answer to that question if we want to have meaning in our lives. He said, "Inner security and peace of mind will result."

The discussion closed as Professor Rogge recounted what he considers to be his greatest personal accomplishments. "My best contribution is the close personal relationships I have developed with my students, my advisors and my colleagues. I am now secure and I can say I need to have people like me...That gives meaning to my life and makes me well."

Senate Increases Spending

The Student Senate approved spending funds for tee-shirts, calendars, and stipends, as well as a volleyball court.

The volley ball court, proposed by Jeannie Foody, who surveyed about forty students, and came up with the court as the best suggestion. There were others, said Foody, but "they were too weird," to be put to use.

The court will be located on campus, with a sand lot, regulation size net, and ball. The cost of the proposal is not to exceed \$1400.

In other business, the Senate approved spending approximately \$225 on tee shirts, which would identify the senate members, and "increase visibility" according to Dawn Jackson. Also approved was the sum of \$58.60 for calendars. Senator Eddy Abakporo voted against all the proposed spendings, and specifically asked that the Senate not purchase a calendar for him.

Larry Lulay also opposed the spending, and requested that he get something more than a tee-shirt to "cover my posterior," when the students find out about all the approved spendings in light of the \$35,000 deficit in the budget.

Also on the agenda was the stipend policy. The Senate voted to increase the stipends about 15% to cover the total cost of tuition for the trimester. In some cases, senators do not receive stipends, and Eddy Abakporo indicated that foreign students do not receive full stipends for their tuition costs, because they pay out of state residence fees, which are considerably higher than in state tuition costs.

Dean Borelli, who was also at the meeting, indicated that the stipends were "roughly equal to tuition" now, and that stipends weren't "intended to be equal to tuition but only the credit hours that the student passes."

Lulay contested the increase, as

did Abakporo, but the vote passed.

In commenting on the action, Dawn Jackson said, "The Senate passed more motions today than at any other meeting this trimester." Gala Jenkins was elated over the

accomplishments achieved at the meeting, and said, "I think this will improve our (the Senate) image, and make us more accessible. Students don't know who we are."

Credit For Tour Of Mideast Offered

"Religious issues of the Middle East," a course offered by Governors State University, will become more than a textbook exercise this summer for students who choose to take a two-week tour of Egypt and Israel.

The tour, which is arranged by Seminars International, Inc., Chicago, will leave O'Hare International Airport on Thursday, June 16, and return on Wednesday, June 29. It includes three days and four nights in Egypt and eight days and nine nights in Israel.

The Rev. Mr. Joseph Agne, former pastor of Pilgrimage Protestant Congregation in Park Forest South and currently of First United Methodist Church of Harvey, will serve as a GSU community professor and tour guide. Agne has taught several classes at GSU in the past.

Agne will lead the students in

discussions of the significance of such important sites as Cairo, the pyramids of Giza, the tomb of Pharaoh Tut-Ankh-Amon, Memphis, the Colossus of Ramses II and many others in Egypt. In Israel, they will visit such historic places as Tel Aviv, Tiberias, Nazareth, Masada, the Dead Sea scroll caves at Qumran, Jerusalem and Mt. Sinai, to mention only a few.

Student participants must attend lectures prior to the trip and write papers to earn 2 hours of undergraduate or graduate credit.

Cost of the basic trip is \$2,298. In addition, students seeking credit will pay tuition fees of \$94.50 for graduates or \$85.50 for undergraduates, plus a \$50 workshop fee. For further information, contact Chris Cochrane in the GSU Office of Special Programs and Continuing Education at (312) 534-5000, Ext. 2121.

When writing, Ernest Hemingway often subsisted for days at a time on a "moveable feast" of crackers, raw green vegetables, and peanut butter sandwiches.

BOG Members Reappointed

Dr. Donald E. Walters, Executive Director of the Board of Governors of State Colleges and Universities, announced that Governor James R. Thompson has reappointed three members to the Board for a regular 6 year term: Dominick J. Bufalino of Norwood Park Township, Mrs. William Froelich, Jr. of Gridley, and William E. Hoffee of Fairfield.

Bufalino is secretary of Continental Distributors in Rosemont and earned the law degree from the University of Catania Law School. He has served as Chairman of the Board since 1980.

Froelich, a licensed funeral director, has been a member of the Board's Executive Committee since 1980. She also serves as the Board's representative to the State

Universities Retirement System Board. In addition, she is a member of the McLean County Board as well as its Executive Committee and is active in many civic organizations in Gridley and throughout the area.

Hoffee holds the J.D. from Vanderbilt University and practices law in Fairfield and is active in numerous public service organizations.

The Board of Governors has jurisdiction over five state universities: Chicago State University, Chicago; Eastern Illinois University, Charleston; Governors State University, Park Forest South; Northeastern Illinois University, Chicago; and Western Illinois University, Macomb.

PERRY RIDDLE SPEAKS ON PHOTOS

by Mark Muehler

Award winning photojournalist, Perry Riddle of the Chicago Sun Times spoke to a group of 40 persons, Friday evening March 18th in the Media Dome. The gathering was the Infinity Photographer's Association's 6th in a series of lectures promoting photography at GSU.

"Composition is always an important thing with me in anything I do. The fun of waiting for all the compositional elements to fall into place is the most exciting thing in photojournalism," Riddle declared.

Combining a sharp wit with knowledge attained through 22 years in the business, Riddle explained the requirements of his craft. "One can't be an ambulance chaser and make it in photojournalism. Spot news is really a small part of what we do," he said. He stressed that different styles are important, as is having a good technical background. "I even do Ansel Adams pictures once in a

Perry Riddle, Photojournalist, discusses style and composition with one of GSU's students.

Photojournalists have little or no control over the selection of assignments, he said. "It's like a fire station. We cover a wide variety," he

continued. Riddle related three completely different assignments he had the previous week including photographing homeless people, the 3 Chicago mayoral candidates, and a survivor of the Holocaust who had lost all his relatives. However, Riddle revealed, "some of my best photos were taken on the way to or from a photographic assignment."

while," Riddle added.

He pointed out that one has to have a feeling for the artistic qualities of photography, as well as the need to tell a story. The photojournalist has to be a perceptive observer of people, said Riddle. He has to recognize the decisive

moment that shows the peak action and the interrelationships of the characters, he continued. "The photographer is constantly thinking, what is the point of the story?" Riddle stated.

WASHINGTON

ADDRESSES

CONFERENCE

Congressman Harold Washington, Chicago mayoral candidate, and Ambassador Mamy Lamine Conde, of the Republic of Guinea, headed a list of more than 100 speakers and panelists for the Ninth Annual Governors State University Third World Conference held at McCormick Inn on March 23-26.

Washington delivered the keynote address at the 7 pm session on Wednesday, March 23. His topic is "Governance in a Multi-ethnic City." Conde talked about "Power and Stability in Africa."

While no overall theme was attached to the ninth Third World Conference, development was the overriding concern of the participants. Nearly a third of the panels emphasized this aspect in such areas as international law and nationalism; agricultural marketing; Caribbean/Latin America; women; science and technology; modernization and industrialization and politics.

VETERANS REGISTER IN ADVANCE FOR BENEFITS

by Doug McNutt

All veterans attending Governors State who are eligible for monthly V.A. educational benefits should advance register for the Spring/Summer 1983 trimester as early as possible. When you do so, **be sure to bring a copy of your advance registration form to the Office of Veterans' Affairs** so that your intended enrollment can be certified to the Veterans Administration.

If your enrollment certification is received by the V.A. prior to **April 1, 1983**, there is a good chance that there will be no delay in receiving your first check for the Spring/Summer term. If your certification reaches the V.A. after

April 1, 1983, your checks for the next trimester and payment for the break period between terms will start approximately 4-6 weeks after the V.A. receives your certification.

Those who don't advance register or who do, but fail to notify the Veterans' Office, will be certified at the time of their final registration. A copy of your final registration form is required for this purpose.

In general, it is important that Vets inform the Vets' Office of any action that affects your enrollment status. Prompt reporting of these actions will result in fewer check problems and delays.

Poetry Corner:

Virtues

Friends, faculty, student persons,
Give a listen:
I come before you today to speak
Of rusty walls and leaky ceilings;
Not to ridicule
But praise them.

What foresight those gods of
T-square and triangle possess.
To fashion a building,
As ours,
That within a brief few years
Could recycle back into the very ore
Whence it came.
An ecological feat -- truly.

Consider springtime
Without five-gallon buckets
And the enchanting
Plop-plop, plop-plop, plop-plop,
Of melting snow.
Consider no more raindelays
Or classes cancelled to wet grounds.

Do not be swayed
By the feeble voice of reason;
Hold fast our virtues,
Rusty walls and leaky ceilings.

Rising Student Fees

The Student Activity Fee increase, whether it is \$25 or \$20, will not be finalized until the Board of Governors approves the recommended increase. It probably won't go into effect until the next academic year, and will not effect this year's student body.

However, this year is when the error in estimated enrollment occurred, and next year's students will be asked to compensate for that error. Two basic errors were made that effected the deficit of \$35,000; first, the over estimate of enrollment, and second, an accounting error made in the business office.

Senator Steve Bluth suggested changing from the accrual method of bookkeeping to the cash method, which will make up for portions of the deficit. An excellent idea, and on paper, it looks great. The alternative and second recommendation is that the fee increase will cover some of the shortfall.

Why should the student body for the year 83-84 be expected to make up for an accounting error? The

over estimate is a penalty that the student body has to accept, and the figure \$20,000 is the amount of the over estimate in enrollment.

The other amount, \$15,000 is due solely to an accounting error, and although President Blackburn, of the Senate doesn't want the next few senates to inherit the deficit, it is unfair to expect one year's student body to accept the burden. Another solution is to spread the deficit over the next three or four years, and let the burden be softened by dividing the deficit.

The real problem is that this happened at all. An explanation is due to not only the senate, but the whole student body. When money is handled poorly, business fails, and in these troubled economic times, no one, and certainly no institution, can afford mistakes that can amount to as much as a year's salary.

Some measures must be taken to insure the University Community that this type of mistake will not happen again.

CLA Shut Down

One little known but important aspect of GSU is the Center for Learning Assistance. Those who want extra help with their studies are able to go to the CLA and receive tutorial help with their studies.

A service such as this is going to be more important in the future with the advent of competency testing. Recently, University officials pointed to this center, with pride, when addressing the participants at the recent Community

Colleges Articulation Day.

However, this Center is now curtailing its services, because of funding cuts. In fact, it will be unable to operate during the spring/summer term.

This is certainly short sighted planning on the part of the University. Hopefully, those in a position to plan the budget for the next fiscal year will reconsider their decision in the light of the benefits the students derive from this service.

Slow Freight Trains

The Articulation for the community college counselors was delayed because there was a slow moving freight train at the Stuenkle Road crossing of the ICG tracks. Many times this happens to students rushing to classes.

It is really frustrating.

The INNOVATOR doesn't have

an answer to this problem. However, it would like to raise the question. Isn't it about time that something be done about this grade crossing?

It certainly is a heavily used crossing. What about a viaduct over the crossing?

Personal Opinion

War's danger

by C.F. Shanahan

We've come to a crucial time in history now, with high technology and massive changes in our economy. It is a time where every move we make politically may be hazardous and life threatening. When President Reagan said, "I call on the scientific community that gave us nuclear weapons to turn their great talents to the cause of mankind and world peace," he spoke in a contradiction of terms.

I don't want to be blown off the face of the earth. There is little logic in saying that the build up would... "reduce the danger of nuclear war," as President Reagan said in his television speech last Wednesday. Raising the threshold of nuclear attack, and increasing our strategic arms, no matter how little or much, is like two men holding shot guns in each others

faces and daring the other to pull the trigger.

At a time when Tate is proposing to close GSU, and Governor Thompson is spending our money on jet fliers, it's time we reorganize our priorities and begin focusing on the real problem of our age. Keeping America educated so we can continue to be the leaders of the world and show the world that capitalism does work and will work with or without half of the world turning Red.

If we are really concerned about our future, we must contact our representatives in Washington, and insist on their opposition to nuclear arms build-up. The Senators are: Charles Percy/ Capitol Building?/ Illinois Senate/Wash. DC; Alan Dixon; The Congressman from the GSU area is George O'Brien/ Capitol Building/ (House of Representatives) Washington D.C.

Letters

Editor, The Innovator:

The University has just concluded its Academic Convocation on Quality in the University. Several very good ideas were presented, and I hope The Innovator will report them for the benefit of those who could not attend.

We need to go a step further, as Dr. Pucci and Dr. Gross suggested. We have heard some ideas, now "What about me, Lord?" What shall I do? What shall we do?

What are the performance

objectives, what are the behavioral competencies? What are the concrete, specific, observable, measurable behaviors we are going to engage in to improve the quality of GSU? How are we going to implement, how are we going to put into practice these ideas?

That is the challenge. What am I going to do differently? What are you going to do differently? What are we, who collectively are the University, going to do differently?

Citizen's Planner Workshop; (session 3), 9 am - 1 pm

BPA Profs in India

Three university professors in the College of Business and Public Administration have been invited to present a series of lectures on statistical quality control before top management groups in India in March.

Dr. Robert Hart, professor of statistical quality control, and his wife, Marilyn, professor of statistics, will conduct the seminars based on the theories and practices of Dr. W. Edwards Deming. They will be assisted by Dr. Z. A. Malik, professor of management, who arranged for the seminars in his native land.

The GSU team will be the guests of Bharat Heavy Electricals, Ltd. (BHEL), of New Delhi, one of the largest manufacturers of electrical equipment in the world, as well as Maruti, Inc., an automobile company being set up by the Indian government in collaboration with

Suzuki of Japan. They left on March 13 and will return early in April.

The Harts are recognized as leading exponents of the Deming methods, which are credited with propelling Japan to the forefront of production quality. They have presented seminars in some of the leading companies in the U.S., including Ford, General Motors, TRW and A.O. Smith. In India, the team will conduct two-day seminars for top management groups at three BHEL facilities and one at Maruti.

"Seminars of this kind are providing help to top management in the USA, and can do the same for their counterparts in India," Malik said.

University officials state that this trip is being financed entirely by the Indian hosts. No state or federal funds are involved.

Alma Martin, a recipient of this year's Gavin Award, standing in front of Dr. Gavin's picture between Dr. Elmer Washington [L] and Mitchell Kline [R]. Martin is a GSU alumna. Washington and Mitchell are directors of the Foundation.

Graduates Receive Gavin Award

by Janet Gale Rhodenburg

Two Governors State University (GSU) graduates were presented awards from the Dr. Charles E. Gavin Memorial Foundation in Englewood Hall recently.

The Gavin Foundation, which its president, Dr. Elmer Washington, said puts into effect "the strongest force known to man and that force is the force of love," honored Mimi Kaplan and Alma Martin as "two very dedicated women of the South Suburban area" during its Twelfth Annual Meeting which coincided with National Women's History Week.

For Kaplan, one of the founding members of the Gavin Foundation, the award was one of a series of honors for her outstanding efforts to educate the public about breast cancer and provide support for its victims through the Y-ME Breast Cancer Support Program, which she co-founded.

Previous Awards include the CHICAGO SUN TIMES Thomas

Jefferson Award, the Voluntary Action Award from Chicago United Way and Mayor Jane Byrne and Governor James Thompson's Award Fit for Health Award for Contributions to Women's Health.

Kaplan received a Master for Library Science from Rosary College and a Masters of Arts from GSU where she is a University Professor of Library Science.

Martin was elected to the Prairie State College Board of Trustees in 1979; elected to a second term and is presently serving as Board Secretary.

She received an Associate of Arts from Prairie State College, a Bachelor of Arts from GSU where she is presently a Graduate Student in the Intercultural Communications Program.

As a student, Martin was recognized in "Who's Who Among Students in American Colleges and Universities" and "International Youth Achievement."

Job Notes

by Mary Hughes

A company spends months and many dollars planning a marketing program for their products. Getting a job is also marketing; in this case, the product is yourself.

How many months are you prepared to spend? Too many people think they can leave a job one day and find another the next. In the past, in certain types of jobs that was possible. This is not true in most situations today. The higher the salary, the more complex the job, the longer it will take to find. No company is going to hire just anybody for a position when they know they have lots of choices.

Here is where marketing comes in. You must convince the employer that you are the best product available. You must demonstrate that you have the skills, the abilities, the knowledge, and the company compatibility to do the job better than the next guy.

Start with your resume. Have you given yourself enough gestation time to develop an effective personal selling document? It can't be done overnight. Resume writing has changed over the years. Today's resumes are more achievement-oriented than in the past. Do you present the image of a person who can do

the job. Stop in to see me if you need feedback on your resume.

"The Global Technological Revolution: Impact on Employment, Business and Public Policy" is the topic of the World Affairs Conference. The conference will be held at the Harvey Holiday Inn on April 15 and 16. Call GSU, 534-5000, Ext. 2558, for details.

"Returning to the Job Market: Mature Women" will be presented by Betty Nicholson and Adele Freed of the South Suburban Council on Aging on April 13 from 9:30 a.m. to 12 p.m. Contact the Women's Resource Center for further information on Ext. 2435.

Mark your calendar for the Career Fair in the Hall of Governors on April 13, 1983, from 1 to 5 p.m. No pre-registration is required, just come and talk to employers. Call Eric Bell, Ext. 2281, for more details.

EpHE 6067 Math and Computer Science Instructor

PhD necessary. Salary \$18,000-24,000. To teach freshman and sophomore courses in mathematics and computer science (FORTRAN, COBOL, BASIC, P/I, RPG II). Preference given to those individuals with doctoral degree with prior college teaching experience. Deadline April 1. Eunice, Louisiana
